Hence, the values of figures in decimals, as well as in whole numbers, are increased in a tenfold ratio by removing them one place towards the left hand, and diminished in the same ratio by removing them one place to the right. Thus, in the decimal.004, by removing the point one place to the right, and consequently the figures of the decimal one place to the left, we have.04, which denotes Tfo, or T\$ o, and is ten times the given fraction, TAr, Dut by iQ troducing a cipher after the point, which removes the figures a place to the right, we have.001)4, or ttoo which is evidently only a tenth part of the given fraction Jjjj, or ToVW From these principles it will appear evident, that: 119. A decimal is multiplied by 10, if the separating point...
