RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 38 pages. Original publisher: Champaign, IL : US Army Corps of Engineers Construction Engineering Research Laboratory ; Springfield, VA : National Technical Information Service, distributor, 1999 OCLC Number: ocm44770740 Subject: Roofs -- Maintenance and repair. Excerpt: . . . CERL SR 99 62 15 the large majority of current and future Armys roofing projects are replacements, the quality of roofing procured through such means will have a substantial im-pact on the overall performance of the Armys roofing assets. Typically, formal design and project specifications are not developed for projects administered un-der roof requirements contracts. Aside from being required to install a certain generic type of membrane and thickness of insulation, the contractor is allowed significant latitude in what he provides. The Army has little assurance that it is receiving an adequately designed replacement roofing system. The best that can be hoped for, perhaps, is that a manufacturers standard design is being used, which may or may not appropriately address specific requirements such as fire protection, structural uplift, location, climate, and user needs. 4. Design quality also can suffer due to insufficient feedback from the installer and the user. As an example, a designer can specify a flashing detail that does not provide sufficient information or proves to be impractical from an installation perspective, or does not serve its intended function as constructed. Sometimes, a particular aspect of the roof design (e. g. , interior gutters, nonremovable counter-flashing) may result in an excessive maintenance burden for the user. Without a formalized process for communicating these problems back to the designer, they are likely to be repeated. Opportunities The establishment of an internal roofing committee within Engineer Districts and DPWs could formalize the engineering process and help to...
