

Screening: Evidence and Practice

By Director of Rd Nhs Executive (Anglia Oxford) J A Muir Gray,
Angela E Raffle

Oxford University Press, United Kingdom, 2007. Paperback. Book Condition: New. 213 x 137 mm. Language: English . Brand New Book ***** Print on Demand *****.Screening is the routine testing of populations to identify individuals who may have a particular medical condition or disease. It is carried out by both government and private organisations with the aims of: better prognosis/outcome for individuals; to protect society from contagious disease; to allow rational allocation of resources; to allow selection of healthy individuals; and for research purposes. About GBP500 million is spent on screening each year in Britain alone, and it is an issue that has relevance in health systems and for the general public and media. For many years, screening was practised without debate, but in the 1960s serious challenges were raised about standard screening procedures. Benefits of screening must be judged against negative side-effects, and concern was raised about potential and actual harm arising when people without a health problem received dangerous and unnecessary investigations and treatments as a result of routine screening tests. Controversy raged and only now 50 years later, is there widespread recognition that quality assured service delivery and proper consumer information are essential. In addition to debate over...
