GALVESTON. I do not propose to undertake upon this occasion, however profitable it might be, to discuss in detail the subject of croupous pneumonia from a bacteriological point of view, but rather, after mentioning some of the more salient points which have been established in recent years in regard to the infective cause of this disease, to deduce some practical conclusions concerning its complications, prevention and treatment. Before proceeding with this imperfect statement of the nature and peculiarities of the infections agent in croupous pneumonia, it will be well to fix in our minds the meaning of the terms infection, infectious disease, contagium, contagion, etc. , as at present understood. We must get rid of the hazy and indefinite ideas...
