Reviews

*It is just one of my personal favorite publications. It is among the most awesome publications I have read. It is extremely difficult to leave it before concluding, once you begin to read the book.

The female is similarly colored, but duller. It p.rcters the snowbanks and glaciers, picking up seeds and fj?e!ing upon insects found about the hanks of the melting snow. In yinter it comes into the valleys along with the first driving snow storms. It has a medium heavy bill that is black in summer and yellow in winter; a black crown bordered with gray, the gray not-spreading down; the general body color deep cinnamon brown with thin, blackish streaks; upper tail feathers, wings and tail, pinkish. The second specimen of this bird, as known to science, was taken in Utah by Captain Stansbury, on May 1, 1850, 25 years after Swainson had taken the first one to London from the Arctic regions. These birds have thejabit of starting up from the ground, the whole flock all at once, not one after the other, when they fly from eating the. seeds of the weed-covered snow fields. When in the air, the flock A LYRIC IN COLORS. 127 as a whole changes its form, seeming to tip and veer. That the males aid the females in brooding is an inference from the worn feathers of both sexes just after the breeding season. In company with crossbills, these birds are found about many of the valleys in winter, but go high up into the mountains in spring and summer. There they live near the snow banks and delight in snow storms. They fluff up their feathers...
